

Mainframe Services

Doing more with less - Addressing the mainframe labor shortage

Mainframe resource shortages are reaching critical levels due to retirements, lack of new entry level talent, and competition vying for remaining available talent. Celsior can help you fill the talent gap and, at the same time, limit or reduce your costs.

Managed Mainframe Operations

- z/OS Operating System Support
- LPAR Support
- Sysplex implementation and support
- Hardware asset management
- Encryption
- Report management and retention

Customized Mainframe Training

- Identification of diverse candidate pool
- Customized training based on your mainframe needs
- Post-deployment support and upskilling including strong trainee community support

Mainframe Professional Services

- Application development (including CICS, DB2, IMS, etc.)
- Application support & maintenance
- Mainframe data center transition planning and execution

Mainframe Modernization

- Modernization of applications on the mainframe
- Application migration to cloud or Linux-based distributed systems

With a wealth of mainframe and data center experience, Celsior fills the critical knowledge and resource gaps companies face given the expensive and shrinking labor pool supporting the mainframe market. Using a full suite of engagement models, Celsior can help you overcome the critical mainframe labor shortage with superior services spanning mainframe development, support, and operations.

Our team of experts has the mainframe technology experience using proven tools and ITIL processes that deliver exceptional managed operations services for Level 1 and 2 support at an OS, software delivery model 24x7 .

All services are a la carte and can either be bundled together or procured separately. Services can be provided on a managed service, staffing augmentation, or professional services basis.
